REASONS FOR ALLOWANCE

- The following is an examiner's statement of reasons for allowance: The present invention is directed towards a method and system of maintaining and processing image data received from multiple sources to form a composite image comprised of image data from each of the multiple sources. Each independent claim identifies the uniquely distinct feature “ for computing a composite image in a compressed domain based on the compressed domain image data received from multiple external sources by performing one or more of the operations of, blending select received image data and overlaying select received image data, decoding the composite image and rendering the composite image on the shared display and wherein all data exchange between the server and the external sources is in the compressed domain”. The closest prior art, Tanaka (USPN 7,127,124 B2) discloses, when image data sets are inserted in image data insertion areas in a template, the image data sets can be set preferably in the insertion areas with easy operation, a user connects a user terminal to a print order reception center via a network, and uploads the image data sets to be

used, the user specifies reference points in the respective image data sets by using instruction input means, an order reception server displays composite images generated by matching the image data reference points with reference points predetermined in each of template data candidates at the time the template candidates are displayed; while Peterson (USPN7,095,905 B1) discloses, merging images to form a panoramic image, either singularly or in combination, fail to anticipate or render the above underlined limitation obvious.

- Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
